

Sydney Mail – Off-Campus Setup Guide for Outlook 2003

Document Description: Setup instructions for Outlook 2003 for Sydney Mail. For **off-campus access only**. This method is not applicable across the university's wireless network.

For user by: All staff and students setting up Outlook 2003 for Sydney Mail.

Quick Start:

E-mail Address: Your Sydney Mail email address, following the Sydney Mail email naming conventions: UniKey@uni.sydney.edu.au

Account Type: IMAP

Incoming mail server: outlook.com on SSL port 993

SMTP Server: pod51000.outlook.com on TLS port 25

Password: Your UniKey password.

Background

These instructions are only relevant to PCs operating Outlook 2003.

Detailed Instructions

1. Close Outlook 2007 if it's open.
2. In Control Panel, click **Mail**.

In Windows XP

- (a) Click **Start > Control Panel > User Accounts > Mail**. (In Classic view, double-click **Mail**.)

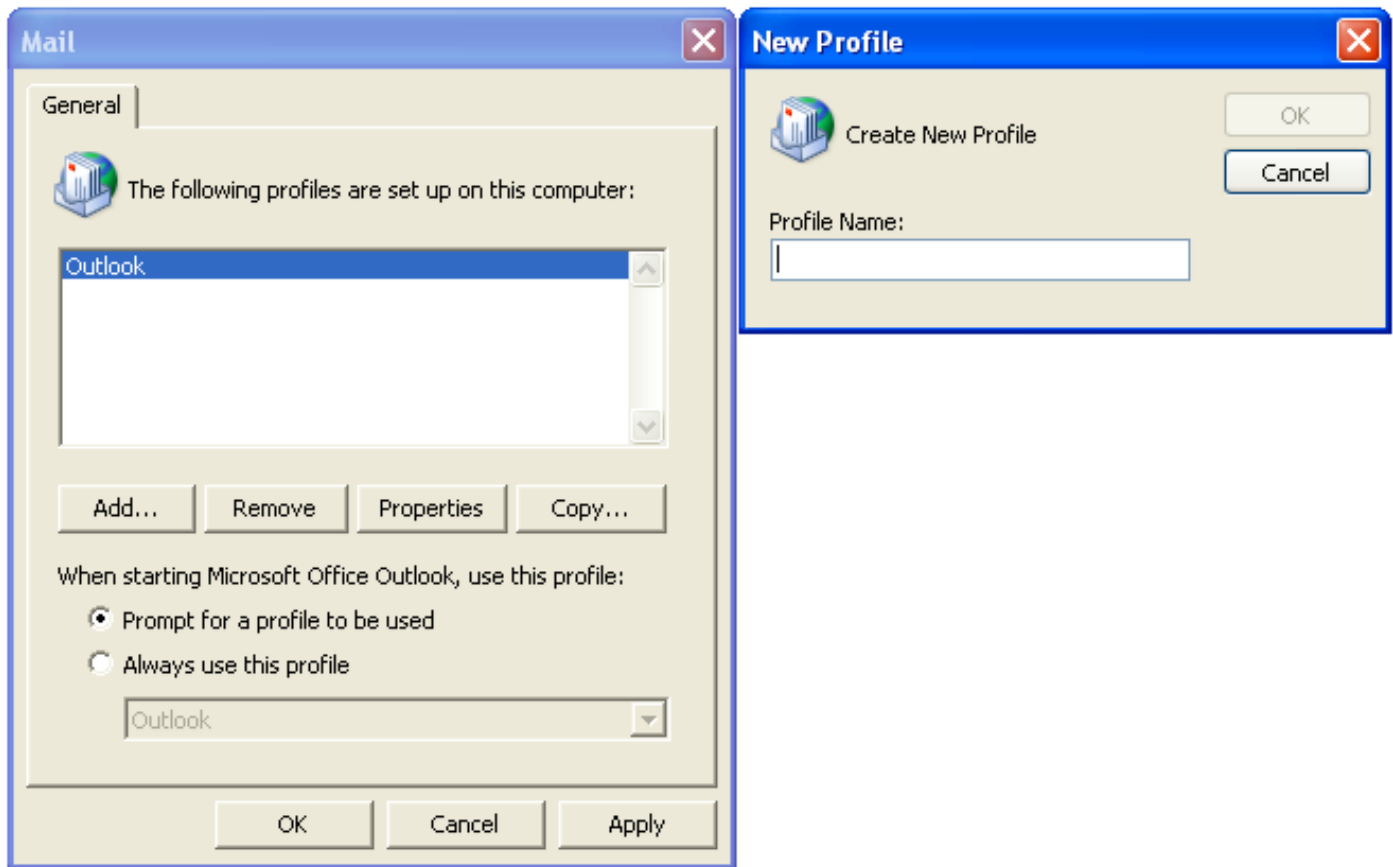

Figure 1 - Control Panel Mail Icon Screenshot

In Windows Vista

- (a) Click **Start > Control Panel**.
- (b) In the 32-bit edition of Windows Vista, click **User Accounts** (or **User Accounts and Family Safety**) > Mail. In the 64-bit edition of Windows Vista, select **Additional Options > View 32-bit Control Panel Items**, and then double-click **Mail**. (In Classic view, double-click **Mail**.)
3. In the **Mail Setup** dialog box, click Show **Profiles > Add**.
4. Type a name for the profile, say **Sydney Mail** and then click OK. (As a best practice, make sure you choose **Prompt for a profile to be used** radio button)

5. When the **E-Mail Accounts** dialog box opens, select tick the box **Add new e-mail account**.
6. Once the **Email Accounts** window appears, choose option **IMAP**.

Under **User Information**:

- a) In the **Your Name** box, enter the name you want users to see when you send e-mail from this account.
- b) In the **E-mail Address** box, enter your Sydney Mail e-mail address.

Under **Server Information**:

- a) Select **Account Type** as **IMAP**.
- b) Enter **Incoming mail server** as outlook.com
- c) Enter **Outgoing mail server (SMTP)** as **pod51000.outlook.com**

Under **Logon Information**:

- a) In the **User Name** box, enter your Sydney Mail e-mail address.

- b) Make sure the **Remember Password** box is un-ticked and leave the password field blank

Note: Don't select Log on using Secure Password Authentication (SPA).

E-mail Accounts

Internet E-mail Settings (IMAP)
Each of these settings are required to get your e-mail account working.

OK Cancel

8. Click OK, then open your Outlook email client, choose the profile created in step 4 and start using Sydney Mail.

What else do I need to know?

You need the Windows Live ID that your administrator gave you to use with Sydney Mail and your password to access Sydney Mail. Your Windows Live ID account is also your primary e-mail address and includes the name of the domain, for example, fran2377@uni.sydney.edu.au.
